Handle with ratchet, without HF connection	RS810-000
Curved guiding tube	RS008-000
Insert grasping forceps, fenestrated	RS000-864

Description	Ordering no.
Flexible trocar, 6 mm, complete, 70 mm Obturator	RU 0430-06
Scissors for delicate tissue reconstruction, 18 cm	RU 1321-18M

# Piraña Cut - One instrument three functions

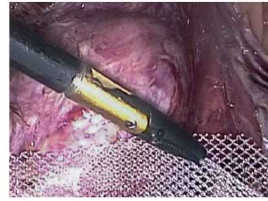

Due to its several functions the Piraña Cut reduces the necessity of instrument exchanges during an operation and thus helps minimize the loss of CO<sub>2</sub>.

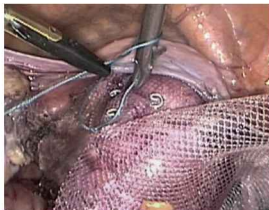

### Scissors

Sharp scissors for the final cut after the suturing procedure.  
Recommended suture material:  
monfil suture 0-2/0  
polyfil suture 0-2/0 absorbable.

### Forceps

Teeth 1:2 enable a tight grip of the tissue prior to suturing.

### Needle Holder

The fine structure of the jaw functions as a second needle holder thus assisting in the taking/handing over of the needle from/to the laparoscopic needle holder.

### Special Coating

The black coating of the insert allows for a longer lifetime of the scissors blades and causes less reflexion.

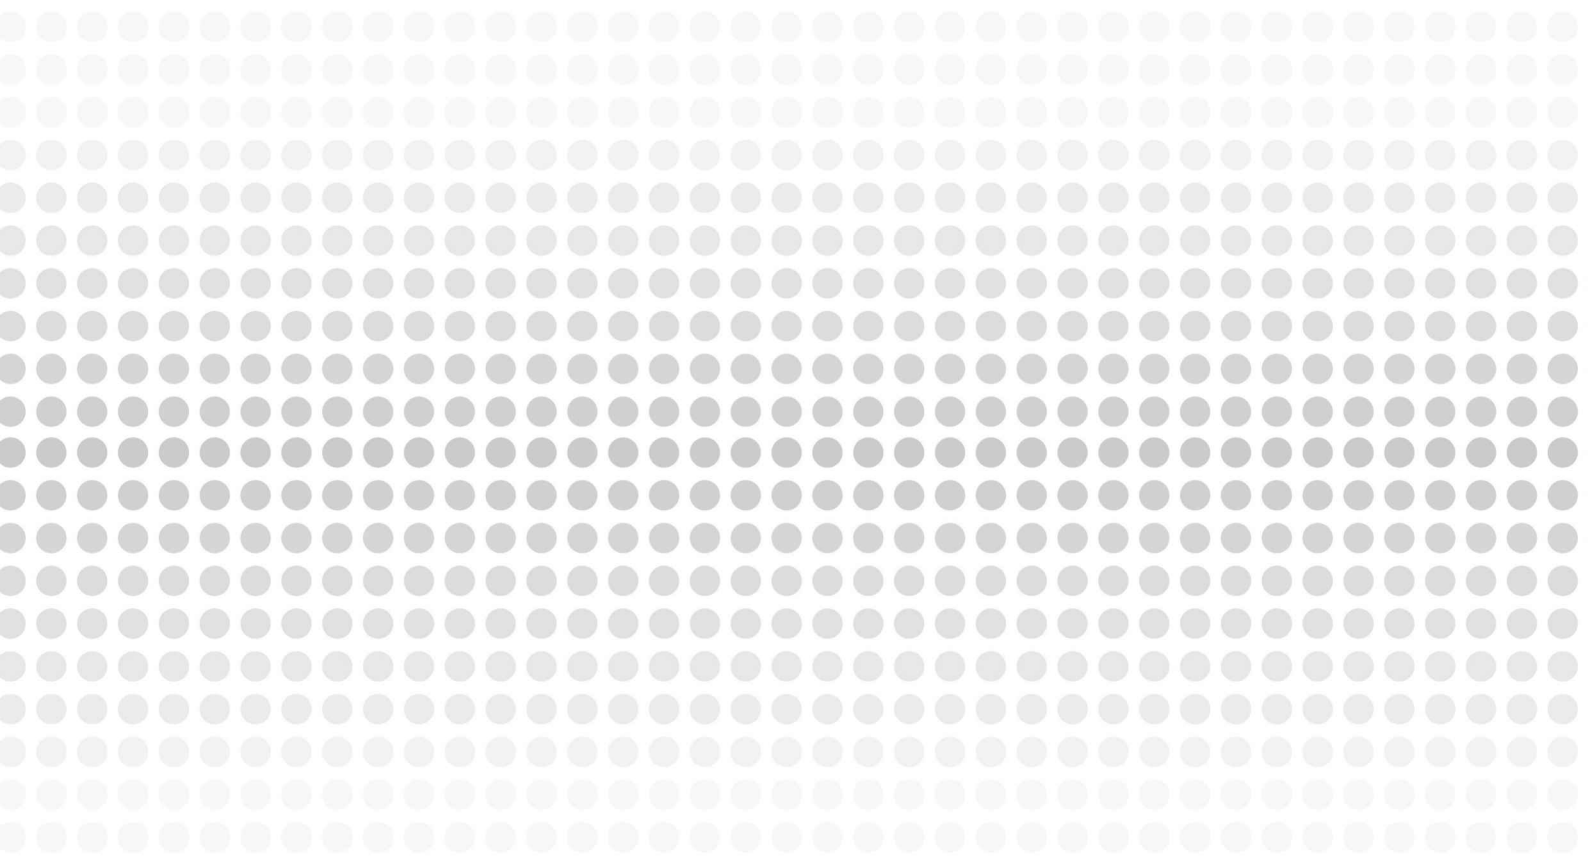

A complete **SCREW-IN** Instrument consisting of:  
- Handle, Tube, Insert

		Multifunctional laparoscopic instrument Piraña Cut, 1:2 teeth, double action, Ø 5 mm		
Insert, only	Length	Ordering no.
